Allowable Subject Matter

1. Claims 1-24, 27-31, 33, 35 and 37-39 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claim 1 recites an arrangement for preparing a solution comprised of a balance and a plurality of pipettes. The balance includes a weighing pan, display, operating unit, processor, storage memory and data interface. Each pipette includes a microprocessor, memory unit and data interface. The data interfaces of the balance and each pipette may communicate with each other and each pipette has an identifier that signals when the pipette is chosen. The storage memory of the balance is encoded with a program for preparing solutions based on input instructions or stored data. The program is also configured to select a pipette and set the volume. Claim 10 recites a method for preparing a solution comprised of the steps of providing the balance and pipettes having the programs, selecting a pipette and setting the volume, activating the pipette identifier combining the substances to form the dilution. Claim 21 recites a balance having a weighing pan and a memory. The memory includes a program configured to perform a selected work procedure to form a solution as well as configured to select a pipette from a plurality of pipettes and set the volume.

The Examiner considers the Dellacoma reference to be the closest prior art. Dellacoma teaches an apparatus and method for preparing solutions containing a balance connected to a control unit with a program, but does not teach the electronic pipettes.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
